Date: March 25, 2025

Subj: 3-year reappointment of adjunct professors

This correspondence is for the reappointment of the title of adjunct associate professor for David Fuentes and adjunct associate professor for Craig Rusin for a three-year period beginning July 1, 2025. Below, I will explain why continuing each adjunct relationship is important for the CMOR Department and Rice.

David Fuentes is an associate professor in the Department of Imaging Physics at the University of Texas MD Anderson Cancer Center. Dr. Fuentes has a strong interdisciplinary background in applied mathematics, imaging physics, engineering, scientific computation, and mathematical modeling of physics-based phenomena.

Craig Rusin is an associate professor in the Department of Pediatrics-Cardiology at the Baylor College of Medicine. His research aims to develop computer algorithms that can monitor patients and provide early warnings of life-threatening events.

Hence, these appointments are of value to the department, the school, and the university.
